|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Project designation</b>          | Empower academia for knowledge transfer for value creation in the Atlantic Area                                                                                                                                                                                                                                        |
| <b>Project code</b>                 | EAPA_842/2018                                                                                                                                                                                                                                                                                                          |
| <b>Objective</b>                    | Work towards the design and implementation of actions between triple helix players to foster innovation and competitiveness within Blue Economy sectors. Upgrade Academia skills for knowledge transfer (KT) and innovation, enabling the design of market-directed Research, Development & Innovation (RDI) projects. |
| <b>Programme Priority</b>           | Stimulating innovation and competitiveness                                                                                                                                                                                                                                                                             |
| <b>Programme Specific Objective</b> | Enhancing innovation capacity through corporation to foster competitiveness                                                                                                                                                                                                                                            |
| <b>Total budget</b>                 | EUR 2,792,677.76                                                                                                                                                                                                                                                                                                       |
| <b>Start date</b>                   | 01/03/2019                                                                                                                                                                                                                                                                                                             |
| <b>Conclusion date</b>              | 30/06/2023                                                                                                                                                                                                                                                                                                             |

## Frontier IP

### Project Partner

**Beneficiary** | Frontier IP Group plc

**Eligible costs** | EUR 134,321.2

**Financial support from the European Regional Development Fund (ERDF)** | EUR 100,740.9

EMPORIA4KT was a project led by FCT NOVA, involving a total of 17 partners from Portugal, Spain, France, Ireland and the United Kingdom. It was a funded initiative under the European Union's INTERREG Atlantic Area program. This Project embraced a robust methodology for technology transfer training and put forth initiatives to develop essential tools and organised workshops among the triple helix— Academia, Industry and Public Authorities. These endeavours were aimed at fostering strong relationships between academia, business, society and government stakeholders within the European Blue Economy.

**Frontier IP** has been an integral part of the EMPORIA4KT project from the beginning in 2019. During 52 months Frontier IP actively supported the different Project activities that aimed to support and create tools for knowledge transfer, and was the leader of Work Package 5 (WP5) *Mature risk assessment and cost effectiveness tools* being responsible to conceive mature risk assessment and cost-effectiveness tools. The primary goal was to collect industry-specific information related to the Blue Economy to deliver contents that could serve as a risk assessment tools for business projects, such as the Attrition Model. These invaluable resources aimed to support the route to

commercialisation of early-stage technologies (EST) and guide project success rates. In case you are interested in these contents, please free to contact our email.
